SUMMARY

Results-driven Software Engineer and **Associate Technical Consultant** with extensive experience in Odoo ERP development and full-stack web technologies. Proven expertise in building scalable applications using Python, Django, and Next.js, with a strong track record of delivering **3+** Odoo implementations and optimizing business workflows by 40%. Passionate about system architecture and technical problem solving.

EXPERIENCE

Leaders Corporate Private Ltd
Dec. 2025 – Present
Associate Technical Consultant
Karachi, Pakistan

- Acting as a primary Odoo Developer and Consultant, customizing ERP solutions to meet complex client requirements.
- Developing advanced Odoo modules using Python, XML, and JavaScript, ensuring seamless integration with existing workflows.
- Providing technical consultation on system architecture and database optimization for large-scale Odoo deployments.
- Collaborating with cross-functional teams to migrate legacy systems to modern Odoo environments.

Hexalyze Consultant Services
June 2025 – Dec. 2025
Associate Software Engineer
Karachi, Pakistan

- Spearheaded **10+ full-cycle Odoo implementations**, delivering tailored solutions for Sales, HR, Accounting, and Projects.
- Engineered custom PDF reports using **OWL (Odoo Web Library)** and XML, enhancing client reporting capabilities.
- Automated critical workflows, **reducing manual data entry by 40%** and minimizing human error.
- Resolved complex stability issues across multiple modules, ensuring **99.9% uptime** in production.

Hexalyze Consultant Services
March 2025 – May 2025
Trainee Software Engineer
Karachi, Pakistan

- Developed a comprehensive company website using **Next.js, Keystone 6 CMS, and PostgreSQL**.
- Built 6+ high-performance web pages, ensuring clean UI implementation and adhering to Core Web Vitals.
- Designed custom CMS modules that streamlined content management, **cutting administrative time by 30%**.
- Optimized database queries and frontend assets, resulting in a **20% improvement** in page load speeds.

PROJECTS

Enterprise Odoo ERP Suite | *Odoo, Python, OWL* Jan. 2025 – Present

- Delivered 3+ implementations for Sales, HR, and Accounting modules.
- Engineered custom OWL-based reports, boosting efficiency by 40%.

Custom Report Header & Footer Module | *Python, XML, QWeb* FEB-2026

- Developed a custom Odoo module to replace the default QWeb report header and footer.
- Designed company-branded PDF report layouts by customizing external_layout templates without modifying core modules.
- Ensured compatibility across Sales, Purchase, Accounting, and Inventory reports through a reusable report layout module.

Hospital Management System | *Python, XML , JS ,Owl Framework* May 2024

- Developed a custom Hospital Management System module to manage patients, doctors, appointments, and medical records.
- Automated appointment scheduling and patient record management using Odoo models, views, and workflows.
- Customized forms, reports, and access rights to streamline hospital operations and improve efficiency.

Purchase Request Multiple Approval | *Python, XML* Apr. 2024

- Developed a custom Odoo module for multi-level purchase request approval workflows.
- Automated approval routing based on user roles and approval hierarchy. Customized forms, security rules, and notifications to streamline the procurement process.
